

Computer

We have a number of stationary computers in the open areas of the school, which students can use during lessons. However, as some teaching materials will only be available in digital form, it is essential that you also have your own up to date computer (no more than 4 years old).

As a student of the school, you will be able to install a free version of Microsoft Office for Windows and Mac. You also have the opportunity to install a license for Microsoft Windows 10 Education.

You will hear more about how to use the school's IT system in the course of the first couple of weeks.
