

Computer

We have a number of stationary computers in the open areas of the school, which students can use during lessons. However, as some teaching materials will only be available in digital form, it is essential that you have your own up to date computer (no more than 4 years old)

Kolding Gymnasium recommends that you use a Windows or Mac computer. Chromebook or other mobile devices are not enough.

As a student of the school, you will have the possibility to install a free version of Microsoft Office for Windows and Mac. You also have the opportunity to install a license for Microsoft Windows 10 Education.

You will hear more about how to use the schools' IT system in the course of the first couple of weeks.
