

Computers

It is essential that you have your own up to date computer (no more than 4 years old) Kolding Gymnasium recommends that you use a Windows or Mac computer. Chromebook or other mobile devices are not enough. As a student at the school, you will have the possibility to install a free version of Microsoft Office for Windows and Mac, and to install a license for Microsoft Windows 10 Education. You will hear more about how to use the school's IT system during the first couple of weeks.

Calculator

The graphing calculator you should buy for IB is called **TI-84 Plus**. You can buy a new TI-84 Plus online, but you might be able to find an offer elsewhere that is cheaper.
